DETAILED ACTION

Reason For Allowance

1. Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record (Tsuchiya) does not teach nor suggest in detail the address translation method between a plurality of addressing zones which allows communication from a public zone to a private zone in combination with all the elements of each independent claim as argued by the Applicant (See Page 3-5 of Applicant enabling specification,). Tsuchiya teaches about a technique for hosting a service on a cluster of machines using network address translator but like conventional NAT only allowed communication from a private zone to a public. So as indicated by the above statements, Applicant's arguments have been considered persuasive in light of the claim limitations as well as the enabling portions of the specification.
